SUPPORTED TECHNOLOGY

Docutek has partnered with Interspire to sell, install, and support products ranging from a full featured E-Commerce system to an E-Mail Marketing System.

We also specialize in the Linux / Apache / MySQL / PHP suite of open source technologies. This is the same powerful platform of open source technologies running some the web's most popular sites including: Yahoo, Pepsi, Facebook, Feedburner, iStockPhoto, YouSendIt and more. Other core technologies include AJAX, Javascript, Adobe Flash, Adobe Flex, W3C Standards Compliance, Web Services, Google Maps API and Yahoo Maps API, and Facebook Development Platform.

Do you have a great idea for an online business?

Come talk to us about it. We can explain what is involved in making your idea come to life and help you layout the steps to get there.
